

## radino Leonardo

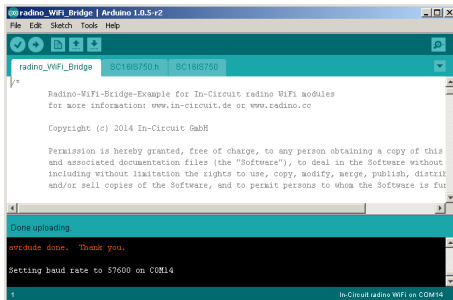

The In-Circuit **radino** Leonardo is a **radino** carrier board in an Arduino Leonardo form factor.

It provides a spring socket suitable for all **radino** modules.

The **radino** Leonardo includes level shifters to adapt the 3.3 V I/O-voltage of the radio modules to the external I/O-voltage.

The reference for the level shifters is selectable.

Combined with any **radino**/**radino 32** module it is full Arduino compatible.

## Features

- Arduino compatible with **radino**/**radino 32** module
- USB connector for programming **radino**/**radino 32**
- ICSP connector for programming **radino**
- SWD connector for programming **radino 32** / **radino SC**
- 4x Socket connector with all **radino** module signals available
- Level shifters for all input and output signals
- User LED, RX/TX LEDs and Power LED
- Input voltage: 5 V DC (USB) or 8-24 V DC (power supply)
- Onboard 3.3 V regulator
- Temperature range from -10 °C to +70 °C
