

## radino 32 DW1000

The In-Circuit radino 32 DW1000 combines an STM32L1 with the DW1000 RF Transceiver in a small form-factor EMC-compliant module.

It's part of the radino-series, which provides full-Arduino-compatible wireless communication devices in a small form factor, all pin-compatible to each other.

## Features

- Arduino-compatible
- UWB Transceiver DW1000 connected internally
- IEEE802.15.4-2011 UWB compliant
- Supports high tag densities in RTLS
- STM32L151CC by STMicroelectronics with 32-bit ARM® Cortex®-M3 CPU
- 256 kbyte Flash, 32 kbyte RAM, 8 kbyte EEPROM
- Low Power RTC
- 12 bit ADC and DAC
- Capacitive touch sensing supported
- 23 multifunctional GPIOs (14 PWM, 10 ADC IN, 1 DAC OUT)
- USB, I<sup>2</sup>C, SPI, 2xUSART

## Applications

- Precision real time location systems (RTLS) using two-way ranging or TDOA schemes in a variety of markets:
  - Healthcare
  - Consumer
  - Industrial
  - Other
- Location aware wireless sensor networks

## Overview

The In-Circuit radino 32 DW1000 combines an STM32L151 with the DW1000 RF Transceiver. Despite its small form factor, the radino 32 DW1000 offers great connectivity. Many GPIOs and interfaces (USB, I<sup>2</sup>C, SPI, 2xUSART) of the STM32L151 can be connected to external circuitry.

With our Arduino Library the radino 32 DW1000 becomes fully Arduino-compatible, which enables easy programming, using the Arduino IDE (<http://www.arduino.cc/>).

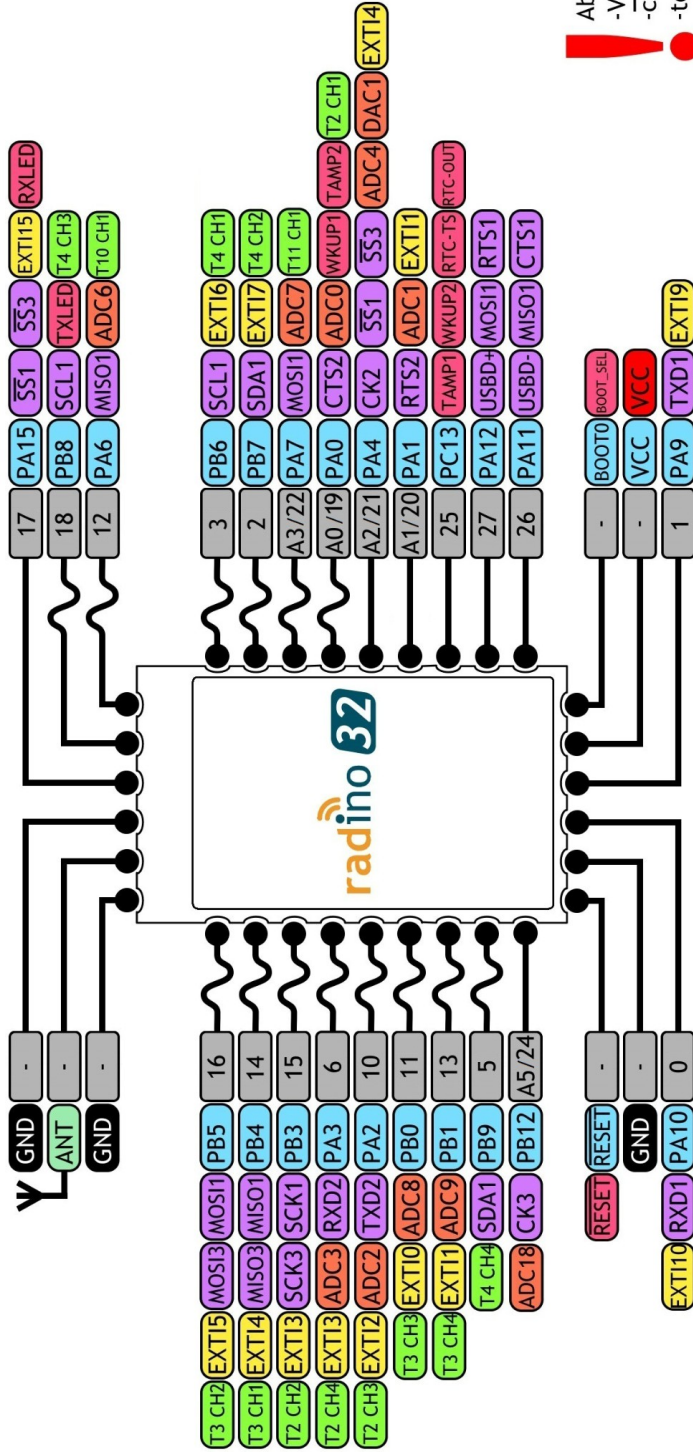

### Micro Controller Section common to all radino 32 modules

### Radio Section – DW1000

# radino 32 Pinout

Connected to internal radio section:

- Power
- GND
- Arduino Pin
- STM Port
- Timer Channel
- Serial Pin
- Analog Pin
- Interrupt Pin
- Control Pin
- Antenna
- PWM Pin

**!** Absolute max. ratings:  
 -VCC: max. 3.6V  
 -current per Pin max. 20mA  
 -total I/O current max. 60mA

## Pinout and Terminal Description

Detailed Interconnection diagram

## Electrical Characteristics

### Absolut Maximum Ratings

Note: These are absolute maximum ratings beyond which the module can be permanently damaged. These are not maximum operating conditions.

Rating	Min	Max	Unit
Storage Temperature	-40	125	°C
$V_{CC}$	-0.3	3.6	V
Current per IO		20	mA
Total Current by sum of all IOs		60	mA

### Recommended Operating Conditions

Environmental conditions

Rating	Min	Typ.	Max	Unit
Operating Temperature	-40		85	°C
$V_{CC}$	2.8	3.3	3.6	V

#### DC Characteristics

$T_A = -40^{\circ}\text{C}$  to  $85^{\circ}\text{C}$ ,  $V_{CC} = 2.7\text{V}$  to  $3.6\text{V}$  (unless otherwise noted)

Symbol	Rating	Min	Typ.	Max	Unit
$V_{BS}$	BOOT_SELECT Voltage	0		5.5	V
$V_{IL}$	Input Low Voltage,	-0.3		$0.2V_{CC}$	V
$V_{IH1}$	Input High Voltage, Pins: P4, P6, P7, P20	$0.9V_{CC}$		$V_{CC} + 0.3$	V
$V_{IH2}$	Input High Voltage, all other Pins	$0.9V_{CC}$		5.25	V
$V_{OL}$	Output Low Voltage			0.5	V
$V_{OH}$	Output High Voltage	$0.9V_{CC}$			V

## Current consumption parameters

### STMicroelectronics STM32L151CC

DC Current per I/O Pin: 25 mA

DC Current over all I/O Pins: 60 mA

Operation conditions:  $V_{CC}=3.3V$ ,  $T_A=25^{\circ}C$

The STMicroelectronics STM32L151CC at radino32 works with HSE = 24 MHz.

At running mode: up to 10 mA

At stop mode: down to 1.5  $\mu A$

For details view manufacturers datasheet.

### Decawave DW1000

Operation conditions:  $T_{amb}=25^{\circ}C$ .

Parameter	Min	Typ.	Max	Unit
Supply current DEEP SLEEP mode	---	50	---	nA
Supply current SLEEP mode	---	1	---	$\mu A$
Supply current IDLE mode	---	19	---	mA
Supply current INIT mode	---	5	---	mA
TX	---	---	160	mA
RX	---	---	240	mA

Values from manufacturers datasheet.

# Package Dimensions and recommended PCB Footprint

## Packaging: tape & reel specification

All radino modules come in a tape & reel package suitable for pick and place machines. Small quantities are delivered as cut-tape. There are 2 kinds of reels available with 100pcs and 500pcs per reel (see section ordering information)

Except the number of modules, all parameters are same to both reel sizes:

- 13" reel size
- 44mm tape width
- tape pocket dimensions 29mm x 19mm x 4mm
- module spacing 24mm
- 2mm hole in the middle of the module body
- 1.5mm tape holes for transport

Transport direction  
(Antenna connector to the right)

## Reflow temperature profile

The single most critical stage in the automated assembly process is the reflow stage. The reflow profile shall not exceed the following maximum ratings:

- heating gradients  $<3^{\circ}\text{C}/\text{sec}$
- peak zone temperature of the module  $<245^{\circ}\text{C}$
- time in peak zone  $<40$  sec.
- time above  $220^{\circ}\text{C}$   $<80$  sec.

Excessive temperatures, transport times and shocks during the reflow process **MUST** not be applied to the module.

Recommended reflow temperature profile

## Washability

The radino modules are wash-resistant, but are not sealed. In-Circuit recommends manufacturing without washing. If washing is needed make sure that a drying time is provided to the modules before applying electrical power. The drying time should be sufficient to allow any moisture that may have migrated into the module to evaporate, thus eliminating the potential for shorting damage during power-up or testing.

If the wash contains contaminants, the performance may be adversely affected, even after drying.

## Ordering Information

Part	Ordering Code	MOQ	Package
radino32 DW1000	901.388	1	Cut Tape, Reels 100/500

All radino modules are available online: <http://www.radino.cc/>

## Certifications

### European R&TTE Directive Statements

The radino32 DW1000 module has been tested and found to comply with Annex IV of the R&TTE Directive 1999/5/EC and is subject of a notified body opinion. The module has been approved for Antennas with gains of 2 dBi or less.

### RoHS / WEEE compliant

WEEE-Reg.-Nr. DE 17225017

FCC  
pending

### Revision history:
